SKILLS SUMMARY

Languages:	Python, C, C++, JavaScript, HTML, CSS
Frameworks & Libraries:	React, Streamlit, Scikit-learn
Databases:	Firebase
Cloud / DevOps:	Azure Cognitive Services, Docker
Developer Tools:	Git, GitHub, VS Code
Core Subjects:	Data Structures & Algorithms, Object-Oriented Programming, Operating Systems
Soft Skills:	Communication, Teamwork, Leadership (Hackathon Team Lead)

PROJECTS

Ashutosh.dev – Interactive Developer Portfolio & Project Showcase GitHub Live	Mar 2026 – Present
- Architected a modular single-page developer platform in React to dynamically showcase technical projects, live demos, and verified certifications across custom-rendered viewports. - Engineered reusable UI components with CSS Grid and media queries, cutting page-load times by optimizing asset delivery and lazy-loading heavy media resources. - Implemented an asynchronous client-side contact workflow with real-time regex form validation and third-party API routing, enabling direct messaging with zero backend server overhead. <i>Tech Stack: React, JavaScript, HTML5, CSS3, Vercel/Netlify</i>	
AgriVision – Smart Crop Disease Classification Platform	May 2026 – June 2026
- Engineered an automated disease classification system using Python and Scikit-learn to accelerate early crop infection diagnosis. - Developed unsupervised clustering workflows leveraging K-Means algorithms to segment crop leaf anomalies and identify degradation patterns. - Deployed a real-time web application via Streamlit, delivering instant predictive analytics and visual diagnostic reports to end-users. <i>Tech Stack: Python, Streamlit, Scikit-learn, Machine Learning</i>	
EcoGrid – Sustainable Renewable Energy Analytics Platform GitHub	Jul 2025 – Jul 2025
- Architected a full-stack monitoring platform using React and Firebase to track live solar and wind energy consumption across power grids. - Designed interactive, data-driven dashboards with dynamic visualizations to evaluate grid efficiency and pinpoint energy loss patterns. - Integrated AI-powered predictive model and gamified engagement modules to incentivize sustainable energy consumption behaviours. <i>Tech Stack: React, JavaScript, Firebase, AI Analytics, HTML/CSS</i>	

TRAINING

DevOps Fundamentals – CI/CD & Pipeline Automation GitHub Certificate	Jul 2026
- Designed and configured an automated CI/CD pipeline in Jenkins (jenkins/jenkins:its) with containerized build agents (maven:3.8.5-openjdk-17) to eliminate manual deployment errors and ensure consistent build environments. - Automated end-to-end delivery stages via a declarative Jenkinsfile—including Git checkout, Java compilation, and testing—successfully generating production-ready JAR artifacts (demo-0.0.1-SNAPSHOT.jar). - Managed container orchestration using Docker, verifying multi-container runtime health via CLI diagnostics and achieving an 'O' Grade (Outstanding) performance rating. <i>Tech Stack: Docker, CI/CD, Git, Linux, Jenkins</i>	

CERTIFICATIONS

Cyber Security Workshop Tech Unique Academy	Feb 2025
Computer Vision App with Azure Cognitive Services Coursera	Sep 2024
Ethical Hacking Skillera	Jan 2024

ACHIEVEMENTS

2nd Runner-Up — Nebula Hackathon (Team Lead for Sustainable Project) Certificate	Apr 2025
2nd Runner-Up — Act Play Quest (Centre for Professional Enhancement) Certificate	Mar 2025

EXTRACURRICULAR ACTIVITIES

LeetCode 100 Days Badge — Solved 100+ Data Structures & Algorithms problems Leetcode	Aug 2026
Lead Content Creator & Coordinator — Digital Crafts Initiative	Jun 2025
Technical Event Participant & Mentor — College Innovation Circles	Jul 2024

EDUCATION

Lovely Professional University	Punjab, India
Bachelor of Technology (Computer Science and Engineering)	Jul 2024 – Aug 2028
Lucknow Public School	Lucknow, Uttar Pradesh
Class XII (Senior Secondary)	Mar 2022 – June 2023
